snowline SPIKES

Pocket-sized safety and grip
snowline spikes are quick and easy to fit onto any footwear
and provide safety and secure grip on slippery, icy or
snowy ground.

snowline spikes are not only good for leisure activities but
can be used for outdoor work, forestry, hunting, or in the
rescue services or the armed forces.

The elastomer rubber construction does away with fiddly
buckles or straps, and means that snowline spikes sit snug
on your footwear and are put on / taken off in just seconds.
All models are CE-certified and approved by TÜV Süd.
5-year warranty.

Materials: Chain + spikes made of hardened stainless
steel
Rubber: High-tech elastomer, tested down to -60°C .

snowline Spikes Hexa

Snowline Spikes Hexa – grip and safety on slippery paths

Ideal for running and street shoes for use on flat terrain and in the city. 14 carbide steel spikes provide a secure grip on slippery ice. In contrast to cheap alternatives, the thorns are firmly embedded in the TPU plastic and cannot be lost.

- Even on light running shoes, the wearing comfort is excellent, the shoe rolls naturally and the hexa spikes are hardly noticeable when running.
- The proven elastomer rubber makes putting on and taking off the Hexa Spikes child's play.
- At only 200 g / pair (M), Hexa Spikes are extremely light and fit comfortably in every bag.

Hexa spikes are available in 5 sizes, each covering 4 shoe sizes.

It.#: 38210	S for size 32-36	190 g/Pr.
It.#: 38220	M for size 36-40	210 g/Pr.
It.#: 38230	L for size 40-44	230 g/Pr.
It.#: 38240	XL for size 44-48	260 g/Pr.
It.#: 38250	XXL for size 48-52	290 g/Pr.

snowline Spikes Pro

The Pro model is the best option for really tough conditions, whether it is for leisure, outdoor work, forestry or hunting. Thanks to reinforced eyelets the elastomer rubber is even more robust and tear-resistant.

- 13,4 mm long stainless steel spikes
- thin elastomer rubber construction provides a secure fit, ideal for sturdier hiking / mountain boots or work boots
- compact pack size and minimal weight (320 g/pair size M)
- zippered pouch included

It. #: 3901	Pro S 280 g
It. #: 3902	Pro M 320 g
It. #: 3903	Pro L 360 g
It. #: 3904	Pro XL 410 g
It. #: 3905	Pro XXL 450 g

snowline Spikes Pro XT

For situations that need plenty of grip: The Pro XT model (the evolution of the Pro model) features six additional spikes at the toe to provide extra grip over steeper ground. CAUTION: snowline Chain-sen spikes are not substitutes for crampons.

- 13,4 mm long stainless steel spikes, additional spikes at the toe
- thin elastomer rubber construction provides a secure fit, ideal for sturdier hiking / mountain boots or work boots
- compact pack size and minimal weight (350 g/pair size M)
- zippered pouch included

It. #: 3802	Pro XT M 350 g
It. #: 3803	Pro XT L 390 g
It. #: 3804	Pro XT XL 440 g
It. #: 3805	Pro XT XXL 450 g

snowline Spikes Trail

The Trail spikes are extremely lightweight (just 170g/pair size M) and pack down extra small. 7,5 mm long spikes ensure safety and perfect grip on icy trails and hard-packed snow.

And in summer, they reduce your energy output and provide more secure footing on muddy, slippery trails or scree-covered paths.

- short, 7,5 mm long stainless steel spikes
- thin elastomer rubber construction provides a secure fit, ideal for lightweight hiking, walking, running or trail running shoes
- extra small pack size and ultra-lightweight (from 150g/pair)
- stuff sack included
- reinforced eyelets provide maximum tensile strength

It.#: 39241	Trail S 150 g
It.#: 39251	Trail M 170 g
It.#: 39261	Trail L 195 g
It.#: 39271	Trail XL 200 g
It.#: 39281	Trail XXL 250 g

extra-small pack size

snowline Trailrunning

snowline Spikes Light

With 12 mm long spikes, the Light model provides even more grip than the Trail model on snowy, frozen or wet ground, or over steeper terrain. This also makes the Light model ideally suited to more ambitious uses such as traversing snow fields or flat glaciated sections.

- 12 mm long stainless steel spikes
- thin elastomer rubber construction provides a secure fit, ideal for lightweight running, hiking or trail running shoes
- very small pack size and lightweight (from 230g/pair)
- stuff sack included
- reinforced eyelets provide maximum tensile strength

It.#: 39071	Light M 230 g
It.#: 39081	Light L 260 g
It.#: 39091	Light XL 270 g

snowline Spikes Walk

The Walk model is designed for a wide range of applications on more moderate terrain. With 12mm long spikes and very little weight, it provides sure-footed grip on snowy or muddy footpaths.

- 12mm long stainless steel spikes
- robust elastomer rubber construction for a secure, snug fit around sturdier winter/ mountain footwear
- compact pack size and minimal weight (from 280g/pair)
- stuff sack included

It.#: 39120 Walk M | 280 g

It.#: 39130 Walk L | 300 g

It.#: 39140 Walk XL | 340 g

snowline Spikes City

With the City model, you can say goodbye to slipping on icy city streets, even when wearing heels.

- short 7,5mm long spikes
- ultra-lightweight elastomer and chain construction for a perfect fit on urban footwear
- extra small pack size and ultra-lightweight (from 60g/pair)
- stuff sack included
- reinforced eyelets provide maximum tensile strength

It.#: 39201 City M | 60 g

It.#: 39211 City L | 80 g

It.#: 39221 City XL | 80 g

snowline Spikes Kids

Safety and grip even for the little ones!

Six short spikes on the entire sole prevent slipping on icy surfaces and provide better grip when romping around in the snow.

It.#: 39003	XXS for size 26-28	150 g/Pr.
It.#: 39004	XS for size 28-30	170 g/Pr.

snowline gaiters

snowline gaiters are ideal for extended hikes through deep snow. High quality design with boot lace hooks, a wide Velcro fastener and an elastic drawcord on top.

- zippered pouch included
- water-resistant, breathable fabric

It.#: 3911-600 snowline gaiters M | 43 cm height

It.#: 3912-600 snowline gaiters L | 45 cm height

It.#: 3913-600 snowline gaiters XL | 47 cm height
